

PM&DC Portal Eradicates Pendency of Cases: A Significant Success

Islamabad 30th May 2024: The Pakistan Medical and Dental Council (PM&DC) successfully launched its updated online portal recently, a major milestone in eradicating the longstanding backlog of pending cases and registrations for medical professionals across Pakistan.

This innovative portal was designed to facilitate the registration and documentation processes, keeping in mind the hurdles in the smooth working of the issuance of cases.

The President PM&DC Prof.Dr.Rizwan Taj after a thorough check and deliberation came up with the suggestion to update the online portal system to cover the loopholes in the existing portal. He apprised the media that the updated portal has already demonstrated its efficacy by issuing more than 5000 cases in just 20 days.

He added that the PM&DC's initiative is part of a broader effort to streamline administrative procedures, ensuring that medical graduates can obtain their necessary certifications without undue delay. The portal is designed to be seamless and easy to navigate, ensuring a smooth user experience. Enhanced security measures to protect the confidential information of applicants. A secure and straightforward process for fee payments and a reliable system for monitoring and managing application statuses.

PMDC Online Portal marks a significant step forward in the digital transformation of the PMDC's services. By eliminating the need for in-person interactions, the portals not only streamline processes but also contribute to a reduction in risk of human error and mistakes.

The PMDC's commitment and initiative reflect PMDC's commitment to improve administrative efficiency and support the medical community in Pakistan. This significant upgradation not only reducing the backlog but also setting a new standard for service delivery in the healthcare sector.
